

THE NATURAL CHOICE

The roof is your home's most important line of defense when it comes to protect you and yours from the elements.

When choosing your building material, remember that natural slate is the most cost effective and **ECO FRIENDLY** product.

Natural slate is affordable when you take into account the long term durability and the cost-free maintenance.

PRODUCTS	WEIGHT* Kgs/m2 - lbs/sq	DURABILITY Years	RE-ROOFING Time
Natural Slate 5mm (1/5")	33 - 660	100	1
Natural Slate 7mm (1/4")	46 - 925	100	1
Natural Slate 10mm (3/8")	66 - 1320	100	1
Clay Tiles	60	40	2
Concrete Tiles	55	30	3
Fibre Cement	25	25	3
Asphalt shingle	12	20	4

* Mass Volume for roofing slate is: $0,0028 \text{ kg/cm}^3$ ($50 \times 25 \times 0,5 \times 0,0028 = 1,75 \text{ kgs/slate}$)

From an environmental point of view, slate roofs are healthy roofs unlike petroleum-based roofing material that can off-gas harmful volatile organic compounds into the air around your home.

If going green is a priority for you, the best choice is to **be natural®**, choose natural slate.
